

## Cord blood education consent

### INFORMATION FOR YOUR PREGNANCY

Dear Expectant Parents,

As part of our continued effort to offer quality services to our patients, we have partnered with Inspection Lifebank to provide education on umbilical cord stem cells and your alternatives regarding family cord blood banking. As the cord is rich in stem cells and can only be collected at birth, we often receive questions regarding the potential benefits. Accordingly, we have engaged Inspection Lifebank, experts in the science, to support us in providing detailed information to patients in this area. The science is progressing rapidly and we want our patients to have the ability to make informed decisions regarding their options in this field.

To receive information on cord blood and tissue banking from Inspection Lifebank, Canada's Largest Cord Blood Program, please complete the form below:
